CT – CONUSTRENNER

The Conustrenner is designed for almost maintenance free operation, large volume water fractionation and fine filtration

Technology

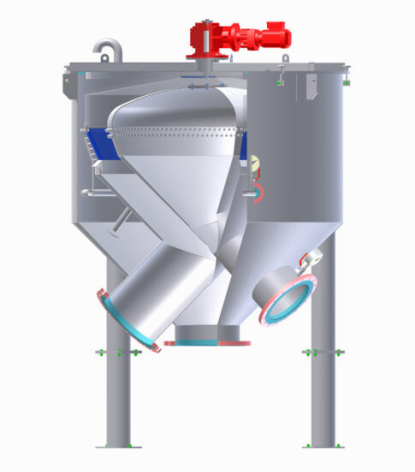

Multilayer conical wire basket with twin or triple layer configuration.
Wire mesh size 40-450 microns.
Wire baskets are continuously cleaned via an internal shower water system.
Portable pilot machines available.

Features

- Stainless Steel Construction
- Easy maintenance access via quick release bolts to remove the top cover of machine
- Completely enclosed machine
- Drive directly coupled to machine
- Low operational RPM

Why to buy

- High mesh basket life, typically 3-5 years
- Simple and reliable operation, with a fast ROI
- Minimum maintenance required
- High volume capacity
- Small machine footprint

Downloaded & Saved / Printed on 19-11-2026

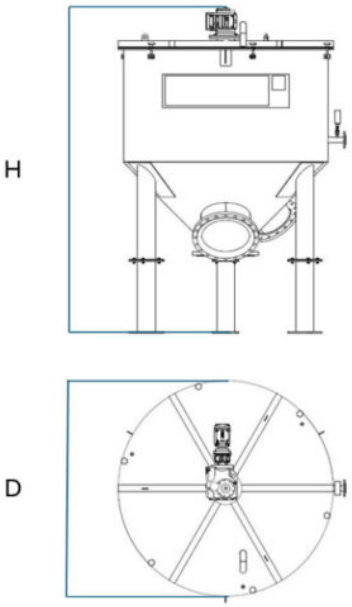

Typical & Proven Process

- Scalping of suspended fibers into coarse and fine fractions
- Deashing, fines and filler reduction
- Reduce fiber loss by recovering fibers from press, wash, and other fiber containing filtrates and sludge.
- Shower water preparation
- White water treatment
