

MMH-ROSP – Meri Material Handling Roll Splitting Machine

The roll splitting machine uses a guillotine style blade to split paper rolls for easier handling and pulping

MMH-ROSP – Meri Material Handling Roll Splitting Machine

The roll splitting machine uses a guillotine style blade to split paper rolls for easier handling and pulping

Technology

The roll splitting machine is used to split paper rolls.

The roll splitting machine can be installed as a standalone unit for manual loading and cutting or integrated into a larger conveyor system. An optional PLC controls the roll splitting machine and automatically splits the roll into customizable lengths.

Features

- Safe cutting
- Robust design
- Highly serviceable
- Customizable parameters in optional PLC
- Two cutting speeds for increased efficiency
- Optional roll stopping machine (MMH-RST) allows for loading and cutting of rolls simultaneously

Why to buy

- Removes operator interaction with roll cutting
- Flexibility to handle many roll diameters
- Easily adjust to changing roll sizes with optional PLC
- Seamless integration into traditional conveying and pulping systems
- Custom integration into existing facilities

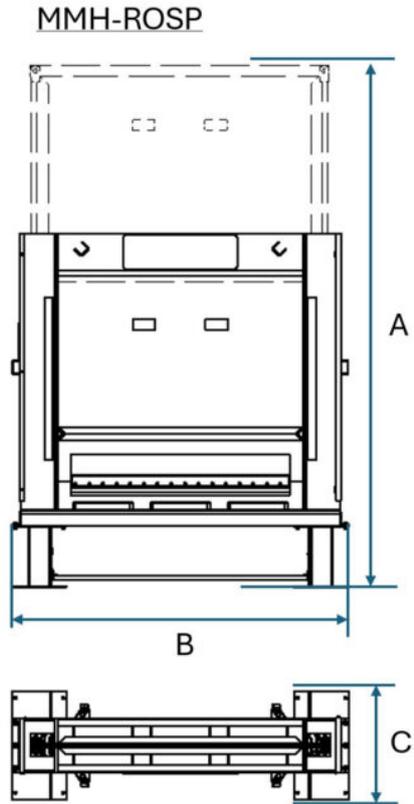

Typical & Proven Process

- Recycled Bale wire cutting Applications:
 - Paper
