TAM TAURO – All in One – Lamella DAF Clarifier

Technology

The TAURO TAM Series
is a Compact Rectangular “all in One” Dissolved Air Flotation system, for smaller and medium flows, which features lamella technology for a highly effective flotation area.
The TAURO TAM combines high-performance DAF technology with compact tank design and “pre-installed – ready to start” peripherals and auxiliary system components.

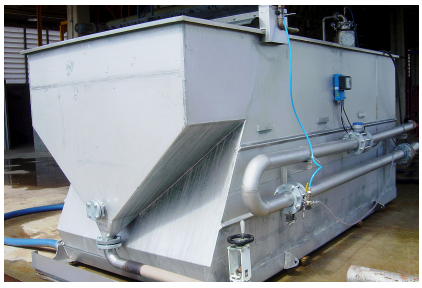

Features

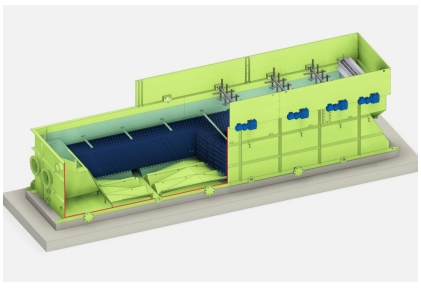

- Compact Rectangular “all in One” Dissolved Air Flotation system pre-installed ready for operation.
- Easy to install on simple flat foundation and little installation space requirements.
- Increased effective flotation area in respect to the installation area.
- Improved sludge dewatering through paddle/dewatering ramp combination.
- Basic operation and high process flexibility.
- Universal Dissolving System or pump with Air Injector as state-of-the-art Air Dissolving Technology.

Why to buy

- Compact pre-installed easy to install Dissolved Air Flotation clarifier combining free flotation and lamella separation in one unit.
- Increased effective flotation area in respect to the installation area.
- Improved sludge dewatering through paddle / dewatering ramp combination.
- Ability to handle high TSS loading, without efficiency reduction.
- Minimized installation costs.

Typical & Proven Process Applications

- Water Clarification applications for Paper and other Industries.
- Filtrate and loop clarification for Internal Water reuse
- Closing of water loops and reduction of freshwater consumption
- Clarification of primary and secondary mill effluent
- Other industrial applications for food, oil, or chemical industry- please ask for details
